

PRO DI AV 2 DI 22P

EN

Passive Stereo DI Box with MIDAS Transformers and Extended Dynamic Range

INPUTS – Connect your high-impedance source audio to the left and right ¼" TS jacks, unbalanced RCA jacks, or a single ⅛" TRS jack. Instrument-level, line-level and even speaker-level sources are accepted.

The connectors that are not used to receive the input signal can also act as a loop-through to pass the signal on to other equipment. For example, if a keyboard is connected to the ¼" inputs, the RCA jacks can connect to an amplifier or personal mixer while the XLR outputs send the signal to the main mixing console.

PAD – A -15 dB pad can be applied to each channel for very hot signals. This does not affect the level of loop-through connections.

OUTPUTS – Send the inputs to a mixing console via balanced XLR cables.

EARTH LIFT – This switch may help reduce unwanted hum by removing the ground connection.

Specifications

Inputs	
Connectors	2 x ¼" TS, ⅛" TRS, RCA unbalanced
Impedance	30 kΩ
Max. input level	30 dBu @ 1 kHz
Outputs	
Connectors	2 x XLR, balanced
Impedance	600 Ω
Max. output level	8.5 dBu @ 1 kHz

System	
Frequency response	20 Hz to 30 kHz (± 1 dB)
THD + N (distortion)	0.01% @ 1 kHz, 0 dBu
Signal-to-noise ratio	105 dBu
Input pad	-15 dB
Power requirement	Passive
Physical	
Dimensions (W x D x H)	118 x 112 x 64 mm (4.6 x 4.4 x 2.5")
Weight	0.53 kg (1.2 lbs)
